Capella Telecommunications, Inc. Named Channel Partner For Hitachi Node+Zero™ RFoG Solution

– Capella Will Serve As Stocking Distributor For Hitachi RFoG Solution In Canada –

ATLANTA, Georgia, November 10, 2009 – [Hitachi Communication Technologies America, Inc.](#), a leading supplier of Fiber-to-the-Premises solutions, today announced that [Capella Telecommunications, Inc.](#), will serve as a stocking distributor for Hitachi's Node+Zero Radio Frequency over Glass (RFoG) product family in Canada. Capella will support cable television and other communications network operators with Hitachi's single-fiber RFoG solution, enabling operators to deliver video, data and voice services via optical fiber and realize significant savings in network operations and maintenance costs. Capella serves customers across Canada, with corporate offices in Peterborough, Ontario and branch offices in Montreal and Vancouver.

"Hitachi is pleased to welcome Capella as a channel partner," said Rick Schiavinato, Hitachi vice president of sales and marketing. "Capella's reputation as a leading supplier to cable television network operators in Canada will be a tremendous asset as we expand the market for our Node+Zero RFoG solution."

"Our customers are very interested in the advantages offered by Hitachi's RFoG solutions," stated Capella's President, Norm Slater. "Capella's technical expertise and focus on superior products has made us a trusted partner to the Canadian cable industry, and we are delighted to now offer solutions from Hitachi, with its well deserved reputation for advanced technology and quality. We look forward to helping our customers deploy fiber optic access, including the operational cost savings and reliability advantages it provides."
